

# BEDROCK DRILLING

## INTRODUCTION

# ABOUT US

Bedrock Drilling offers a comprehensive, London-based drilling consultancy service that is cost effective and aligned with our client goals and expectations. Our team of Directors has significant managerial, technical and logistical experience with large and small operators across the globe. We have the skills to provide our clients with a full range of services to the highest standards of quality, environmental and safety, whilst keeping well costs low.

Bedrock Drilling provides a range of services including well project management, supply chain management, personnel consultancy and well engineering studies. We are based in Central London where we support our UK and international projects.

# KEY MANAGEMENT PROFILES

## **Jon Harris**

Jon has many years of international oil and gas industry experience with BP, BHP and Woodside heritage and has held senior well delivery positions on numerous exploration and development projects on land and offshore. As a Bedrock director, Jon has helped clients to deliver frontier exploration projects from North Africa to the deep water, harsh environment of the South Atlantic.

## **Phil Church**

Phil is an experienced Drilling Manager and a director of Bedrock Drilling. Prior to Bedrock, Phil worked as the Drilling Director for African Petroleum having achieved his industry grounding with Shell and Schlumberger IPM. Phil has an excellent all round knowledge of the industry and, as a Bedrock Director, has managed numerous client well projects in Sub-Saharan Africa and the Middle East.

## **Fariz Najafov**

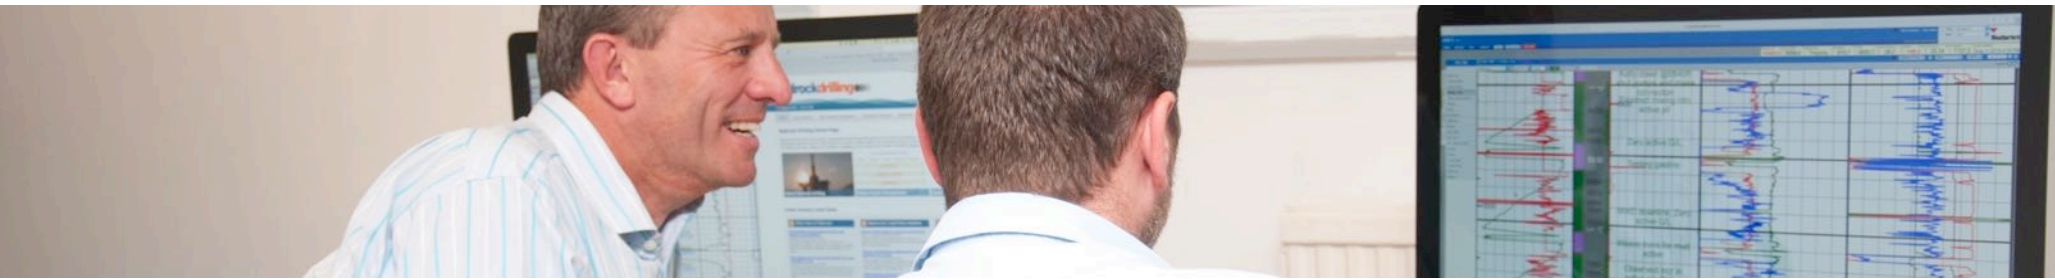

Fariz is Bedrock's Principal Well Engineer and he has significant well engineering experience, initially developed with BP. Fariz's skills are in the detailed planning and execution of land and offshore drilling operations. As a Bedrock Director, Fariz provides the technical systems, engineering and support for all Bedrock projects such that a consistent technical standard is achieved.

## **Adam Beckett**

Adam is Bedrock's Supply Chain Specialist and a director of Bedrock Drilling. Adam has over 25 years' industry experience working with both major operators and small independents in the UK and internationally. Adam's significant knowledge, skills and contacts in the industry have ensured successful and cost-effective delivery of all contracts, procurement and logistics streams for projects in Greenland, UK, North and West Africa and the Falkland Islands.

# WELL ENGINEERING

Every project is different but the fundamental building blocks of project management are key to our success and are always applied to Bedrock projects. The Bedrock Team works closely with our clients from the outset to tailor a project plan from Feasibility right through to Execution.

Our well engineering services include:

- Well Design;
- Completion Design;
- Well Test Design;
- Technical input to well services tenders, evaluations and contracts;
- Operations Programming and Execution;
- Cost estimation and AFE preparation;
- Post Well Reviews and Recommendations;
- Feasibility Studies;
- Technical Due Diligence;
- Risk Assessments (technical, commercial, HS&E);
- Peer Review;
- Well Management Systems; and
- Well Examination.

# SUPPLY CHAIN MANAGEMENT

Led by Adam Beckett, our director of Contracts, Procurement and Logistics, our Supply Chain Management service has been extremely successful for our clients.

- Bedrock Drilling can offer the following Supply Chain Management services:
- Preparation of client Supply Chain Strategy and Project Plan;
- Management of client tender processes including;
  - Pre-qualification of suppliers;
  - Bid list preparation;
  - Preparation of tender packages;
  - Receipt and evaluation of tenders; and
  - Award of client contracts;
- Procurement of client supply vessels, supply base and air support services;
- Establishment of remote supply bases;
- Mobilisation of equipment and personnel;
- Inventory tracking and control; and
- Provision of logistics personnel.

The above services are offered in support of the Bedrock Project Management services or as a stand-alone service to support our client's own operational teams.

# PROJECT MANAGEMENT

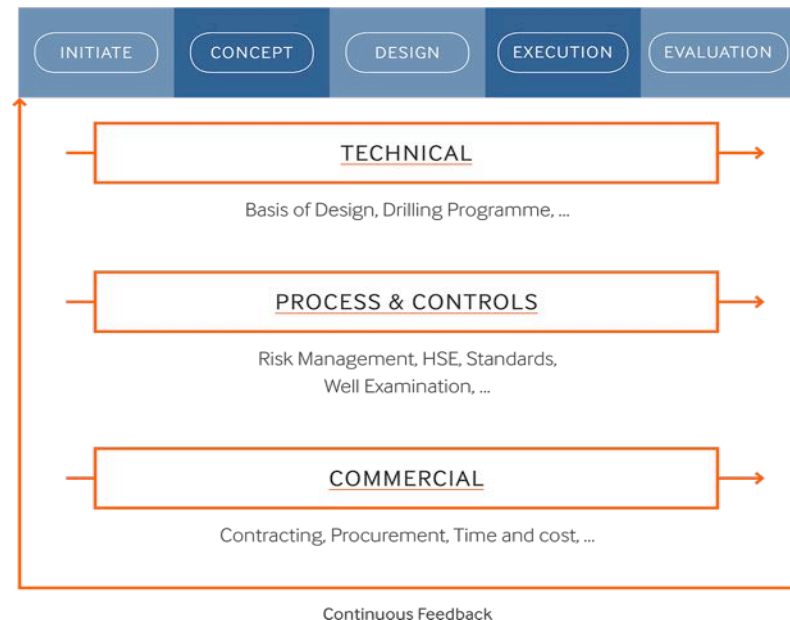

Every project is different but the fundamental building blocks of project management are key to our success and are always applied to Bedrock projects. Our dedicated team works closely with our clients to develop a plan that takes the project from the Initiate Phase right through to Execution.

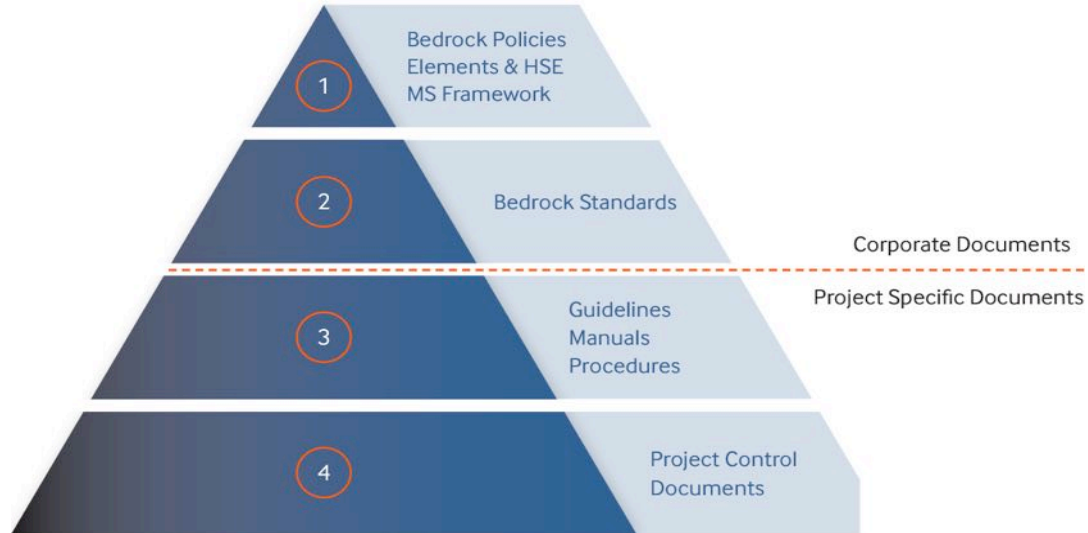

Bedrock also understands the CAPEX constraints that many of our clients are under, and through our cost focused approach we are extremely confident of delivering fit for purpose, low cost wells.

Our project management services include:

- Project planning and tracking
- Well Engineering & Design
- Operations Management
- Logistics planning and execution
- Contracting and Procurement
- Rig selection and rig contracting.
- Rig Integrity Assurance & Acceptance
- Cost Estimation and Cost Control
- HSE Management.
- Management Systems and Processes.
- End of Well Reporting
